Classroom Rules - 6th Grade Science

Success in my class is easily accomplished by following four simple rules:

1. **BE PREPARED**
   A. Have the following supplies in class **EVERYDAY**:
      1) Pencils, *not pens* (sharpened *before* class begins)
      2) Composition Notebook
   B. Students will *actively* participate in their learning by completing all assignments on time, asking questions and contributing to class discussions, and working collaboratively with their classmates.
   C. Be prepared to think and ask questions

2. **BE RESPECTFUL**
   To create a positive learning environment you should treat others the way you would want to be treated. This includes your peers, your teachers, and yourself. *I have zero tolerance for disrespectful behavior.* If you are found being disrespectful you will be given lunch detention to work on correcting the disrespectful behavior.

3. **GIVE 100% OF YOUR EFFORT – THIS WILL GUARANTEE SUCCESS**
   I have high expectations for all of my students and I firmly believe that success is a measure of one’s attitude and work ethic, not one’s aptitude.

4. **ASK FOR HELP**
   Anytime that you feel confused, lost, or just want additional help PLEASE ASK! You may contact me through e-mail, voicemail, meetings during lunch or after school, or by visiting the class web page
